# MICROGEN RAPID CULTURE CONFIRMATION ASSAYS

MICROGEN BIOPRODUCTS HAS USED ITS PROVEN EXPERIENCE IN PRODUCING INNOVATIVE PRODUCTS TO DEVELOP A UNIQUE MENU OF CULTURE CONFIRMATION ASSAYS. THESE ASSAYS ARE DESIGNED TO PROVIDE SIMPLE ONE STEP IDENTIFICATION/ CONFIRMATION FOR A RANGE OF SPECIFIC BACTERIAL PATHOGENS

BASED ON RAPID AND ROBUST LATEX AGGLUTINATION TECHNOLOGY, THE MICROGEN BIOPRODUCTS CULTURE CONFIRMATION ASSAYS OFFER:

RESULTS IN TWO MINUTES

INCREASED EFFICENCY

HIGH SENSITIVITY

HIGH SPECIFICITY

ACCURATE & RELIABLE RESULTS

Protecting Food and Health

# The Microgen<sup>®</sup> Range

## RAPID, EASY TO USE, COST EFFECTIVE

### Salmonella

A sensitive and highly specific test for the identification of Salmonella from clinical and food samples (M42CE)

### Listeria

A rapid test able to detect *Listeria* spp. colonies on agar plate media (F48)

### E. coli 0157

Highly specific serological identification of this potentially verotoxigenic serogroup of *E.coli* (M44CE)

### Legionella

Permits the identification of *L. pneumophila* 1 and 2-15 within seconds directly from agar plate media (M45CE)

### Campylobacter

Able to detect the presence of *Campylobacter* spp. in clinical and food samples (M46)

### C.difficile

Able to rapidly identify this organism directly from agar plate media (M41CE)

### Staphylococcus

Detects both protein A and coagulase enabling the specific identification of *Staphylococcus aureus* (M43CE+M433CE)

### Streptococcus

Allows the rapid grouping of Strep ABCDFG. Availability of individual reagents increases flexibility (M47CE)

### Rotavirus

Able to detect the presence of rotavirus antigen directly from stool samples within 2 minutes (M80CE)

### Adenovirus

Able to detect the presence of adenovirus antigen directly from stool samples within 2 minutes (M81CE)
