

## MICROGEN BIOPRODUCTS LTD

**Improved Dipsticks  
Performance**

# ROTAVIRUS SCREENING

### **M480CE Rotascreen® EIA, 96T**

- Detects the presence of rotavirus in under 1 hour.
- Highly sensitive and specific yet simple to perform due to the use of dropper bottles containing ready- to-use reagents.
- Suited for large or small batches of samples.
- Can be used alongside Adenoscreen® EIA.

### **M80CE Rotascreen® Latex, 50T**

- Sensitive and specific, with a result in 5 minutes.
- Suitable for human or animal use.
- Can be used alongside Adenoscreen® latex using the same faecal sample preparation.
- No special equipment required.

### **M580CE - Rotascreen® Dipstick 25T**

### **M583CE - Rota/Adenoscreen Dual Dipstick 25T**

- Simple and rapid immunochromatographic tests, no need for filtration or centrifugation of sample
- Requires no special equipment.
- Suitable for human and veterinary use

**Both dipsticks have been improved upon due to the use of superior and differing antibodies, to provide:**

- Results in 10 Minutes not 15 minutes
- Longer shelf life of 18 months
- Superior sensitivity (sensitivity 100%)
- Increased readability

# ADENOVIRUS SCREENING

## **M48 ICE Adenoscreen® EIA, 96T**

- Highly sensitive and specific yet simple to perform due to use of dropper bottles containing ready-to-use reagents.
- Detects presence of adenovirus in under 1 hour.
- Suitable for small or large batches of samples.
- Can be used alongside Rotascree® EIA

## **M8 ICE Adenoscreen® latex, 50T**

- Results can be obtained within 5 minutes.
- Based on detection of hexon antigen allows Adenoscreen® to detect all types of Adenovirus
- Can be used alongside Rotascree® latex using the same faecal sample preparation.
- No special equipment required.

## **M580CE - Rotascree® Dipstick 25T**

### **M583CE - Rota/Adenoscreen Dual Dipstick 25T**

- Simple and rapid immunochromatographic tests, no need for filtration or centrifugation of sample
- Requires no special equipment.
- Suitable for human and veterinary use

**Both dipsticks have been improved upon due to the use of superior and differing antibodies, to provide:**
